TO WHOM IT MAY CONCERN

This is to certify that the Building of Notre Dame Public School, Belbagh Bettiah has been constructed under my regular supervision.

The building is RCC framed work with M₂₀ grade of concrete and grade I M.S with C:M (1:6) in Brick work and plaster. Sal wood used in frame and shutter of doors and windows. The building is well plastered inside & outside, fully ventilated and nicely furnished. Sanitary fittings and electrification has also been done properly. The School building is secure and is in safer zone of this town.

So, in my opinion the school has a well established building and bears a very good academic upkeep.
